

NOVEMBER 2020

NEW PROTOTYPE DONE

USB CHARGE TESTER

OVERVIEW:

- Configurable with potentiometer from 0.05A to 4.00 A +/-2%
- Power and voltage measurement
- Delivered with USB-A et USB-C cables
- Digital display
- ON/OFF and settings buttons
- Heat dissipation fan
- 85mm x 50mm x 36mm

Product story

During ground tests performed by Airlines or MRO centers on civil aircrafts (such as Boeing 777 or Airbus A380), a control of EMI disturbances and Aircraft power supply behavior needs to be performed. To do so, these plug and play USB testers are plugged into USB ports of every seats to drain as much power as possible from the Aircraft.
